INDEPENDENT AUDITOR'S REPORT

To the Shareholders and Management of IC SCARDIAN J.S.C.

Opinion

We have audited the financial statements of IC SCARDIAN J.S.C. ("the Company"), which comprise the statement of financial position as at 31 December 2020, and the statement of profit and loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2020, and its financial performance and its cash flows for the year then ended in accordance with the International Financial Reporting Standards.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in the Republic of Kosovo, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matters

We draw attention to the following:

As disclosed in notes 7, 10 and 25 to the accompanying financial statements the Central Bank of the Republic of Kosovo with its decision taken on 26 November 2020 among others has ordered the Company the following:

- the amount of EUR 1,315 thousand given as loan, plus interest should be returned to the Company not later than 30 April 2021.
- the release of a current account in the amount of EUR 1,050 thousand which was pledged as a collateral for the loan taken from the Company's shareholder "Fundway LLC". This amount should have been released from the margin account not later than 31 December 2020.
- One of the ultimate shareholders should return the amount of EUR 240 thousand which he received as salary from the Company in accordance with a contract for consulting services. This amount should have been returned not later than 31 March 2021.

THE POWER OF BEING UNDERSTOOD

AUDIT | TAX | CONSULTING

Up to the date of the approval of these financial statements the Company has not complied with the requirements of the Central Bank of the Republic of Kosovo decision dated 26 November 2020. The Central Bank of the Republic of Kosovo in case of failure to comply with the decision until the deadline has the authority to take other necessary steps in conformity with the legislation in force. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that in our professional judgment were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon and we do not provide a separate opinion on these matters. Each audit matter and our respective response are described below.

Key Audit Matter

Gros Claim Reserves

The company gross claim reserves are composed from: Reported but not settled claim (RBNS), Incurred but not reported claims (IBNR) and claim handling cost.

The determination of the claim reserves requires the management of the Company to make assumptions in the valuation thereof, which is determined with reference to an estimation of the ultimate cost of settling all claims reported and incurred but not yet reported at the Statement of Financial Position date. The company makes use of an actuarial specialist for the estimation of the claim reserves.

The reserves for claims reported but not settled ("RBNS") is set on a case-by-case basis. The reserve is calculated as the expected amount to settle the claim and estimates are adjusted as new information becomes available.

The reserves for incurred and but not reported ("IBNR") are determined based on actuarial techniques. The main assumption underlying these techniques is that a company's past claims development experience can be used to project future claims development and hence ultimate claims costs.

Certain of the above-mentioned factors require judgement and assumptions to be made by the management and therefore we identified the valuation of the claim reserves as a key audit matter.

How the matter was addressed in our audit

We involved actuarial specialists to assist us in performing our audit procedures. Our audit focused on the models considered material and more complex and/or requiring significant judgement in setting of assumptions. Our audit response included the following:

- Tested the design, implementation and operating effectiveness of key controls related to the process of establishing and adjusting gross claims provisions.
- Evaluated the methodology used by the Company for valuation of claim provisions against regulatory and financial reporting requirements.
- We reviewed the methodology and assumptions used by the Company to establish its IBNR losses and performed recalculation of Company's IBNR losses for a sample of the most significant lines of business.
- We performed additional testing procedures on a sample for reported but not settled losses (RBNS) to assess their adequacy.
- In order to assess the adequacy of the RBNS and IBNR reserves reported as the end of prior reporting periods i.e 31 December 2019, we have performed back testing by comparing with claims paid and reserves as at 31 December 2020 ("run off analysis) and considered the results of the analysis in the assumption used for estimating RBNS and IBNR reserves as at 31 December 2020
- We also tested, on a sample basis, whether the input data in the model for recalculation of estimates is accurate and complete.
- We assessed the adequacy of the disclosures included in notes 4D Insurance Risk and 19 Gross Claim Reserves of the financial statements in accordance with International Financial Reporting Standards and regulatory requirements.

Other Information

Management is responsible for the other information. The other information comprises supplementary schedules that includes the "Solvency Margin", "Capital calculation" and "Adequacy of investments of assets covering technical reserves".

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
 error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient
 and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting
 from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional
 omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
 Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on
 the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast
 significant doubt on the Company's ability to continue as a going concern. If we conclude that a material
 uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the
 financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on

the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

 Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report.

Report on Other Legal and Regulatory Requirements as required by administrative instruction no 02/2019

The Shareholders meeting of IC Scardian J.S.C has appointed us on 27 July 2020 as auditors of the Company for the year ended 31 December 2020. Our total uninterrupted engagement is four years.

We confirm that:

- Our audit opinion on the financial statements expressed herein is consistent with the additional report to the audit committee of the Company.
- We have not provided prohibited non-audit services referred to in Article 5(1) of the administrative instruction no 02/2019 and that we have remained independent of the Company in conducting the audit.

1. GENERAL

IC Scardian J.S.C (the "Company") was incorporated under the laws of the Republic of Kosovo and registered with the Ministry of Trade and Industry under registration no. 71055124 as a joint stock company. The Company is 100% owned and controlled by Fundway LLC, being the ultimate parent company.

The Company is licensed as a non-life insurance company. The main business activity of the Company is motor third-party liability insurance and other classes of insurance such are:

- · Property insurance;
- Health Insurance
- Travel health insurance:
- Personal accidents;
- Casco;
- Construction All Risk (CAR), etc.

The Company's registered office is located at: street Perandori Justinian no 69, Pristina, Republic of Kosovo.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

A. BASIS OF PREPARATION AND STATEMENT OF COMPLIANCE WITH IFRS

These financial statements have been prepared on a going concern basis and in accordance with International Financial Reporting Standards ("IFRS"), being Standards and Interpretations issued by the International Accounting Standards Board ("IASB"), in force at 31 December 2020.

The financial statements have been prepared on an historical cost basis, except for investment properties that have been measured at fair value. The financial statements are presented in euros (€) rounded to the nearest thousand (€000), unless otherwise indicated.

The Company presents its statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within twelve months after the reporting date (no more than 12 months) and more than 12 months after the reporting date (more than 12 months) is presented in the respective note.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 3: Significant judgments and key sources of estimation uncertainty.

The financial statements are prepared as of and for the years ended 31 December 2020 and 2019. Current and comparative data stated in these financial statements are expressed in thousands of Euro, unless otherwise stated. Where necessary, comparative figures have been reclassified to conform to changes in presentation for the year.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2020

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Application of new IFRS requirements

The company has applied the following standards and amendments for the first time for their annual reporting period commencing 1 January 2020.

The following new standards and amendments became effective as at 1 January 2020:

- Amendments to IFRS 3 Definition of a Business
- Amendments to IFRS 7, IFRS 9 and IAS 39 Interest Rate Benchmark Reform
- · Amendments to IAS 1 and IAS 8 Definition of Material
- · Conceptual Framework for Financial Reporting

New Standards and interpretations not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2020 reporting periods and have not been early adopted by the Company. These standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

B. FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the financial statements are measured using the currency of the primary economic environment in which the Company operates ("the functional currency"). These financial statements are presented in Euros, which is the Company's functional and presentation currency.

C. PROPERTY AND EQUIPMENT

On initial recognition, items of property, plant and equipment are recognized at cost, which includes the purchase price as well as any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by Management.

After initial recognition, items of property, plant and equipment are carried at cost less any accumulated depreciation and impairment losses.

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over its useful economic life as follows:

Depreciation rates

Shorter of asset useful life or lease

Leasehold improvements
Computers and related equipment
Furniture, fixtures and other equipment
Vehicles

term 20% 20% 20%

Useful lives, residual values and depreciation methods are reviewed, and adjusted if appropriate, at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

D. INTANGIBLE ASSETS

Intangible assets are measured initially at cost. Intangible assets are recognized if it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise; and the cost of the asset can be measured reliably. After initial recognition, intangible assets are measured at cost less accumulated amortization and any accumulated impairment losses. Intangible assets are amortized on a straight-line basis over the best estimate of their useful lives, if any. Intangible assets consist of software licenses and are amortized on straight-line basis over 5 years.

F. INVESTMENT PROPERTY

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in the statement of profit or loss in the year in which they arise, including the corresponding tax effect. Fair values are evaluated annually by an accredited external, independent appraiser, applying a valuation model recommended by the International Valuation Standards Committee. Investment properties are derecognised either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the statement of profit or loss in the year of retirement or disposal. Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property and equipment up to the date of change in use.

F. RIGHT OF USE OF ASSETS

A right-of-use asset is recognized at the commencement date of a lease. The right-of-use asset is measured at cost, which comprises the initial amount of the lease liability, adjusted for, as applicable, any lease payments made at or before the commencement date net of any lease incentives received, any initial direct costs incurred, and, except where included in the cost of inventories, an estimate of costs expected to be incurred for dismantling and removing the underlying asset, and restoring the site or asset.

Right-of-use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the consolidated entity expects to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right-of use assets are subject to impairment or adjusted for any remeasurement of lease liabilities.

The Company has elected not to recognize a right-of-use asset and corresponding lease liability for short-term leases with terms of 12 months or less and leases of low-value assets. Lease payments on these assets are expensed to profit or loss as incurred.

G. IMPAIRMENT OF NON-FINANCIAL ASSETS

Impairment of property, plant and equipment and of intangible assets with finite useful lives

The carrying amounts of such assets are reviewed at each reporting date for indications of impairment and where an asset is impaired, it is written down as an expense through the statement of profit or loss to its estimated recoverable amount. Recoverable amount is the higher of value in use and the fair value less costs of disposal of the individual asset or the cash-generating unit.

The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Companies of assets. If this is the case, recoverable amount is determined for the cash-generating unit to which the asset belongs.

Value in use is the present value of the estimated future cash flows of the asset / unit. Present values are computed using pre-tax discount rates that reflect the time value of money and the risks specific to the asset / unit whose impairment is being measured.

Impairment losses for cash-generating units are allocated first against the goodwill of the unit and then pro rata amongst the other assets of the unit. Subsequent increases in the recoverable amount caused by changes in estimates are credited to profit or loss to the extent that they reverse the impairment.

H. FINANCIAL INSTRUMENTS

Initial recognition and measurement

The Company recognises a financial asset or a financial liability in the consolidated statement of financial position when, and only when, it becomes a party to the contractual provisions of the instrument. On initial recognition, the Company recognises all financial assets and financial liabilities at fair value. The fair value of a financial asset / liability on initial recognition is normally represented by the transaction price. The transaction price for financial assets / liabilities other than those classified at fair value through profit or loss includes the transaction costs that are directly attributable to the acquisition / issue of the financial instrument. Transaction costs incurred on acquisition of a financial asset and issue of a financial liability classified at fair value through profit or loss are expensed immediately.

The Company recognises financial assets using settlement date accounting; thus an asset is recognised on the day it is received by the Company and derecognised on the day that it is delivered by the Company.

Subsequent measurement of financial assets

Subsequent measurement of financial assets depends on their classification on initial recognition. The Company classifies financial assets in one of the following two categories:

(a) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market other than those that the Company intends to sell in the short term or that it has designated as at fair value through profit or loss or available for sale. Loans and receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. Insurance receivables, cash and cash equivalents and other assets are also classified in this category.

(b) Held to maturity financial assets

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturities other than those that meet the definition of loans and receivables that the Company's management has the positive intention and ability to hold to maturity. These assets are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. A provision for impairment of debt securities held to maturity is established when there is objective evidence that the

Company will not be able to collect all amounts due according to their original terms. Terms deposits are classified in this category.

(c) Available for sale to financial assets

Available-for-sale financial assets are assets that the Company intends to hold for an indefinite period and are not classified as financial assets at fair value through profit or loss or held to maturity financial assets. As at 31 December 2020 Investments in Government Securities are classified in this category.

Impairment of financial assets

At the end of each reporting period, the Company assesses whether its financial assets are impaired, based on objective evidence that, as a result of one or more events that occurred after the initial recognition, the estimated future cash flows of the (Company of) financial asset(s) have been affected. Objective evidence of impairment could include significant financial difficulty of the counterparty, breach of contract, probability that the borrower will enter bankruptcy, disappearance of an active market for that financial asset because of financial difficulties, etc.

In addition, for insurance receivables that are assessed not to be impaired individually, the Company assesses them collectively for impairment, based on the Company's past experience of collecting payments, an increase in the delayed payments in the portfolio, observable changes in economic conditions that correlate with default on receivables, etc.

Only for insurance receivables, the carrying amount is reduced through the use of an allowance account and subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

For all other financial assets, the carrying amount is directly reduced by the impairment loss.

For financial assets measured at amortised cost, if the amount of the impairment loss decreases in a subsequent period and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed (either directly, or by adjusting the allowance account for trade receivables) through profit or loss. However, the reversal must not result in a carrying amount that exceeds what the amortised cost of the financial asset would have been had the impairment not been recognised at the date the impairment is reversed.

Derecognition

Irrespective of the legal form of the transactions, financial assets are derecognised when they pass the "substance over form" based derecognition test prescribed by IAS 39. That test comprises two different types of evaluations which are applied strictly in sequence:

- Evaluation of the transfer of risks and rewards of ownership
- Evaluation of the transfer of control

Whether the assets are recognised / derecognised in full or recognised to the extent of the Company's continuing involvement depends on accurate analysis which is performed on a specific transaction basis.

Subsequent measurement of financial liabilities

Subsequent measurement of financial liabilities depends on how they have been categorised on initial recognition. The Company classifies financial liabilities in other financial liabilities.

. These liabilities are carried at amortised cost using the effective interest method.

Typically, insurance and other liabilites are classified in this category. Items classified within trade and other payables are not usually remeasured, as the obligation is known with a high degree of certainty and settlement is short-term.

IC SCARDIAN J.S.C NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2020 Derecognition of financial liabilities

A financial liability is removed from the Company's statement of financial position only when the liability is discharged, cancelled or expired (i.e. extinguished). The difference between the carrying amount of the financial liability derecognised and the consideration paid is recognised in profit or loss.

I. PRODUCT CLASSIFICATION

Insurance contracts are those contracts where the Company (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Investment contracts are those contracts that transfer significant financial risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of price or rates, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Insurance contracts can also transfer financial risk.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire.

J. INSURANCE CONTRACTS LIABILITIES

Non-life insurance contract liabilities are recognized when contracts are entered into and premiums are charged. These liabilities are known as the outstanding claims provision, which are based on the estimated ultimate cost of all claims incurred but not settled at the Statement of financial position date, whether reported or not. The liability is derecognized when the contract expires, is discharged or is cancelled.

The reserve for unearned premiums includes premiums received for risks that have not yet expired. Generally, the reserve is released over the term of the contract and is recognized as premium income.

At each reporting date, a liability adequacy test is performed. Changes in expected claims that have occurred, but which have not been settled, are reflected by adjusting the provision for outstanding claims. The provision for unexpired risk is increased to the extent that future claims in respect of current insurance contracts exceed future premiums plus the current unearned premium provision.

Claims arising from general insurance business

Claims incurred in respect of general business consist of claims paid to policyholders during the financial year together with the changes in the valuation of the liabilities for outstanding claims.

Claims outstanding comprise provisions for the Company's estimate of the ultimate cost of settling all claims incurred but unpaid at the reporting date whether reported or not, and related internal and external claims handling expenses and a prudential margin.

Whilst the Management considers that the gross claim reserves and the related reinsurance recoveries are fairly stated on the basis of the information currently available to them, the ultimate liability may vary as a result of subsequent information and events and may result in significant adjustments to the amounts provided. Adjustments to the amounts of claims provisions established in prior years are reflected in the financial statements for the period in which the adjustments are made.

The provision represents the estimated ultimate cost of settling all claims including direct and indirect settlement costs, arising from events that occurred up the reporting date. Unpaid losses and loss adjustment expenses consist of estimates for reported losses and provisions for losses not reported. The method used to determine the provisions for claims, is based on the following applicable statutory rules but is also supported by actuarial valuations.

IC SCARDIAN J.S.C.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2020

The provision for claims Reported but Not Settled ("RBNS") is set on case by case basis. The reserve is calculated as the expected amount to settle the claim and estimates are adjusted as new information becomes available.

As at 31 December 2020 the technical reserves for IBNR for MPTL are determined using chain ladder method based on incurred claims. (31 December 2019: IBNR are determined using Bornhuetter-Ferguson method).

The percentage is estimated by the Company's actuary based on external data and actuarial judgement.

Reinsurance

The Company ceded reinsurance in the normal course of business for the purpose of limiting its potential net loss through the diversification of its risks arising from MTPL, Property, and Personal Accidents lines of business.

Such reinsurance includes treaties and facultative agreements. Only contracts that give rise to a significant transfer of insurance risk and timing risk are accounted for as insurance. Reinsurance arrangements do not relieve the Company from its direct obligations to its policyholders. Reinsurance liabilities comprise payable for outwards reinsurance contracts and are recognized as an expense based on the whole amount agreed with the reinsurer.

Benefits reimbursed are presented in the statement of comprehensive income and statement of financial position on a gross basis.

Anticipated reinsurance recoveries are disclosed separately as assets in the statement of financial position. Reinsurance and other recoveries are assessed in a manner similar to the assessment of claims outstanding consistently with the amounts associated with the underlying insurance contracts and in accordance with the terms of the reinsurance contract.

Deferred Acquisitions Cost

Acquisition costs are defined as the costs arising on the acquisition of new insurance contracts, including direct costs, such as agent commissions, and fees paid to Central Bank of Kosovo.

Deferred acquisition costs and deferred origination costs are amortized systematically over the life of the contract and tested for impairment at reporting date. Any amount not recoverable is expensed. They are derecognized when the related contracts are settled or disposed of.

Liability adequacy test

At each reporting date the Company performs test to ensure the adequacy of claim reserves. The primary tests performed are Claim Ratio Analysis and Run-off analysis of claim reserves.

The claim ratio analysis is performed annually on the major lines of business individually. The calculation is performed on claims alone as well as claims including acquisition costs and any other external claim handling costs. In performing this analysis, the Company takes into account current estimates of cash outflows. The Company does not discount these estimated cash flows because most claims are expected to be settled within one year.

In addition, the Company performs annually a run-off analysis of claim reserves to assess its reserving methodology. The run-off analysis is performed on RBNS and IBNR separately as well as on combined basis. In case the analysis shows major discrepancies, proper adjustments are made to the reserving methodology.

If a deficiency is identified it will be charged immediately to profit or loss by establishing an unexpired risk provision from losses arising from Liability Adequacy Test.

Claims handling costs

Claim handling costs consist of internal and external expenses in relation to valuation, handling and assessment of claims by the Company's personnel as well as external expenses like legal fees and other expenses. Management has estimated claim-handling cost equal to 3.6% (2019: 2%) of total RBNS and IBNR reserves, excluding Border Claims and Guarantee fund handling costs which are determined by the Kosovo Insurance Bureau.

K. REVENUE RECOGNITION

Premium Income

General business written premiums comprise the premiums on contracts incepting in the financial year, irrespective of whether they relate in whole or in part to a later accounting period. Written premiums are disclosed gross of commission payable to intermediaries and exclude taxes based on premiums. The earned portion of premiums received is recognized as revenue. Premiums are earned from the date of attachment of risk, over the indemnity period, based on the pattern of risks underwritten.

The provision for unearned premiums comprises the proportion of gross premiums written which is estimated to be earned in the following financial year, using the daily pro - rata basis 1/365, adjusted if necessary to reflect any variation in the incidence of risk during the period covered by the contract. However, the all the products in force by the Company have linear risk and no adjustments for variation of risks have been currently made.

Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's carrying amount.

L. BENEFIT CLAIMS AND EXPENSES RECOGNITION

Loss and loss adjustment expenses

Loss and loss adjustment expenses and claims consists of benefits and claims paid to policyholders, as well as changes in the gross valuation of insurance and investment contract liabilities, except for gross changes in the unearned premium provision which are recorded in premium income. It further includes internal and external claims handling cost that are directly related to the processing and settlement of claims. Insurance claims are recorded on the basis of notifications received.

M. CASH AND CASH EQUIVALENTS

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less.

N. TERM DEPOSITS

Tern deposits are stated in the statement of financial position at the amount of principal outstanding and are classified according to their maturities. Term deposits with maturities less than three months are classified as cash equivalents, those with maturities over three months are classified as investments in term deposits. Interest is calculated on an accrual basis.

O. SHARE CAPITAL

Share capital represents the nominal value of shares that have been issued. Shares are classified as equity when there is no obligation to transfer cash or other assets.

Accumulated losses

Accumulated losses include all prior period losses.

P. TAXATION

Premium taxes due are calculated in accordance with legislation in the Republic of Kosovo. Insurance companies pay a tax of 5% on gross premiums. Premiums returned and retrospective premium adjustments are deducted from gross premiums to arrive at the tax base. Tax on gross premiums written is presented separately as a deduction from gross premiums written.

IC SCARDIAN J.S.C.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2020

Premium tax constitutes a part of acquisition costs and is deferred in a way consistent with the method of computation of the unearned premiums provision. Insurance companies are not liable to pay corporate income tax on profit in Kosovo. The liability for premium tax ceased to be effective from 5 August 2019.

Corporate income tax

Effective from 5 August 2019 in accordance with Law no. 06/L-105 "On Corporate Income Tax"., insurance companies are required to pay a corporate income tax at 10 % at their taxable profits. The tax rate on taxable corporate income is fixed at 10%.

Current tax is calculated on the basis of the expected taxable profit for the period starting from the effective date of the legislation. Taxable profit differs from accounting profit either because some income and expenses are never taxable or deductible, or because the time pattern that they are taxable or deductible differs between tax law and their accounting treatment.

The tax expense for the period comprises current and deferred tax if any. Tax is recognized in profit or loss, except if it arises from transactions or events that are recognized in other comprehensive income or directly in equity. In this case, the tax is recognized in other comprehensive income or directly in equity, respectively. Where tax arises from the initial accounting for a business combination, it is included in the accounting for the business combination. Taxes other than income taxes are recorded within operating expenses.

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the separate financial statements and the corresponding tax base used in the computation of taxable profit and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each date of the statement of financial position and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realized. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The Company has recognized any deferred tax assets as at 31 December 2020 (31 December 2019: EUR 138 thousand)

Interest income received by the Company is also liable to withholding tax at the rate of 10% (2019: 10%).

Q. EMPLOYEE BENEFITS

Retirement benefits cost

The Company makes no provision and has no obligation for employee pensions over and above the contributions paid into the state pension plan, Kosovo Pension Saving Trust (KPST).

R. PROVISIONS

A provision is recognized when the Company has a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each statement of financial position date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of provision is the present value of the expenditures expected to be required to settle the obligation. Provisions are not recognized for future operating losses.

S. LEASE LIABILITY

A lease liability is recognised at the commencement date of a lease. The lease liability is initially recognised at the present value of the lease payments to be made over the term of the lease, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the consolidated entity's incremental borrowing rate. Lease payments comprise of fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, amounts expected to be paid under residual value guarantees, exercise price of a purchase option when the exercise of the option is reasonably certain to occur, and any anticipated termination penalties. The variable lease payments that do not depend on an index or a rate are expensed in the period in which they are incurred.

Lease liabilities are measured at amortised cost using the effective interest method. The carrying amounts are remeasured if there is a change in the following: future lease payments arising from a change in an index or a rate used; residual guarantee; lease term; certainty of a purchase option and termination penalties. When a lease liability is remeasured, an adjustment is made to the corresponding right-of use asset, or to profit or loss if the carrying amount of the right-of-use asset is fully written down.

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the profit or loss on a straight-line basis over the period of the lease.

T. EXPENSES RECOGNITION

Operating expenses are recognized in profit or loss upon recognized of the service or as incurred.

Operating lease payments

Payments under operating leases are recognized in the profit or loss on a straight-line basis over the term of the lease.

Finance cost

Interest paid is recognized in the profit or loss as it accrues and is calculated by using the effective interest rate method. Accrued interest is included within the carrying value of the interest bearing financial liability.

U. COMMITMENTS AND CONTINGENCIES

Contingent liabilities are not recognized in the financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is not recognized in the financial statements but disclosed when an inflow of economic benefits is probable.

The amount of a contingent loss is recognized as a provision if it is probable that future events will confirm that, a liability incurred as at the statement of financial position date and a reasonable estimate of the amount of the resulting loss can be made.

V. RELATED PARTY TRANSACTIONS

Related parties consist of shareholder and directors of the Company, together with entities which they control, who can exert significant influence over the operations and management of the Company. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

W. EVENTS AFTER THE REPORTING PERIOD

Events after the reporting period that provide additional information about the Company's position at the Statement of financial position date (adjusting events) are reflected in the financial statements. Events after the reporting period that are not adjusting events are disclosed in the notes when material.

3. SIGNIFICANT JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable and relevant under the circumstances. Actual results may differ from those estimated. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of revision and future periods if the revision affects both current and future periods.

Valuation of insurance contract liabilities

For non-life insurance contracts, estimates have to be made both for the expected ultimate cost of claims reported at the Statement of financial position date and for the expected ultimate cost of claims incurred but not yet reported at the Statement of financial position date (IBNR). The ultimate cost of outstanding claims is estimated by using a range of standard actuarial claims projection techniques.

The main assumption underlying these techniques is that a company's past claims development experience can be used to project future claims development and hence ultimate claims costs. As such, these methods extrapolate the development of paid and incurred losses, average costs per claim and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analyzed by accident years, but can also be further analyzed by geographical area, as well as by significant business lines and claim types. Additional qualitative judgment is used to assess the extent to which past trends may not apply in future, in order to arrive at the estimated ultimate cost of claims that present the likely outcome from the range of possible outcomes, taking account of all the uncertainties involved.

Impairment losses on premium receivables

The Company reviews its insurance and non-insurance receivables to assess impairment on at least an annual basis. In determining whether an impairment loss should be recorded in the profit or loss, the Company makes judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from an individual debtor. This evidence may include observable data indicating that there has been an adverse change in the payment status of the debtor.

Estimation of fair values of Investment Property

Company's investment properties are measured at fair value for financial reporting purposes. In estimating the fair value of an asset, the Company works closely with external qualified appraisers who perform the valuation, based on agreed appropriate valuation techniques and inputs to the model (e.g. use of the market comparable approach that reflects recent transaction prices for similar instruments, discounted cash flow analysis etc.). Prices determined then by the appraisers are used by the Company without adjustment. Changes in the fair value of assets and their causes are analyses by the company management. Such valuations require the Company to select among a range of different valuation methodologies and to make estimates about expected future cash flows and discount rates, market prices etc. Information for the valuation of investment property is provided in note 5.b.

Coronavirus (COVID-19) pandemic

Judgement has been exercised in considering the impacts that the Coronavirus (COVID-19) pandemic has had, or may have, on the Company based on known information. This consideration extends to the nature of the products offered, customers, investments and staffing and geographic region in which the Company has its parent. Other than as addressed in specific notes, there does not currently appear to be either any significant impact upon the financial statements or any significant uncertainties with respect to events or conditions which may impact the consolidated entity unfavourably as at the reporting date or subsequently as a result of the Coronavirus (COVID-19) pandemic.

4. INSURANCE AND FINANCIAL RISK

A. Governance framework

The primary objective of the Company's risk and financial management framework is to protect the Company's shareholders from events that hinder the sustainable achievement of financial performance objectives, including failing to exploit opportunities. Key management recognizes the critical importance of having efficient and effective risk management systems in place.

The board of directors approves the Company risk management policies and meets regularly to approve any commercial, regulatory and organizational requirements of such policies. These policies define the Company's identification of risk and its interpretation, limit structure to ensure the appropriate quality and diversification of assets, align underwriting and reinsurance strategy to the corporate goals, and specify reporting requirements.

B. Regulatory framework

The operations of the Company are also subject to regulatory requirements within the jurisdictions where it operates. Such regulations not only prescribe approval and monitoring of activities, but also impose certain restrictive provisions (e.g. capital adequacy, solvency margin requirements) to minimize the risk of default and insolvency on the part of the insurance companies to meet unforeseen liabilities as these arise.

C. Reinsurance strategy

The majority of insurance business ceded is placed on an excess of loss basis and quota share. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Company has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements. The Company's placement of reinsurance is diversified such that it is not dependent on a single reinsurer.

D. Insurance risk

The principal risk the Company faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the Company is to ensure that sufficient reserves are available to cover these liabilities.

The risk exposure is mitigated by diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements.

The Company purchases reinsurance as part of its risk's mitigation program. Reinsurance ceded is placed on both a proportional and non-proportional basis. The majority of proportional reinsurance is excess of loss reinsurance and quota share which is taken out to limit the overall exposure of the Company to certain classes of business. Non-proportional reinsurance is primarily excess-of-loss reinsurance designed to mitigate the Company's net exposure to catastrophe losses. Retention limits for the excess-of-loss reinsurance vary by product line and territory.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Company has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements.

The Company principally issue following types of insurance contracts: motor third party liability insurance, health insurance, property insurance, professional indemnity insurance and other insurance contracts.

For motor third party liability insurance, the most significant risk are material and not material damages caused due to accidents. For property insurance and healthcare insurance most significant risks are: natural disaster, fire, terrorist activities, epidemics, medical science and technology improvements.

The purpose of these underwriting and reinsurance strategies is to limit exposure to catastrophes based on the Company's risk appetite as decided by management. The maximum insurance retentions are 10% of the capital. The table below sets out the concentration of non–life insurance contract liabilities by type of contract:

TOTAL	4,474		4,474
Other Products	479	-	479
Health insurance	147	-	147
Property insurance	118	-	118
Motor Third party liability	3,730	claim reserves	3,730

Health insurance	118	-	118
Property insurance	54		54
Motor Third party liability	4,242	claim reserves 634	3,608
31 December 2020	Gross Claim Reserves	Reinsurance part of	Net Claim Reserves

On 31 March 2020 the Company entered in the reinsurance agreement on Quota share on a clean-cut basis net of incurring reinsurance with maturity date 30 March 2021, subject to 30 days' notice of cancellation by either party. Subsequent to the year end the Company has extended the agreement until 30 March 2023. According, to the agreement, an outstanding loss portfolio entry equal to the Reinsurer's Share of the estimated amount outstanding in respect of unsettled claims (including IBNR) at that date in Euro, in respect of which the Reinsurer will also assume the Reinsurer's Share of all payments made by the Reinsured for claims occurring before the inception of a particular Annual Period but brought into account during such Annual Period. In the event of the expiration or termination of agreement, the reinsurance share of the gross Claim Reserves will be transferred to the Company.

Claim development

The following tables show the estimates of cumulative incurred claims, only claims notified for each successive accident year at each reporting date, together with cumulative payments to date.

Estimate of cumulative claims	 At end of accident year 	- One year later	- Two years later	- Three years later	- Four years later	- Five years later	Total
2015	286	395	361	398	401	372	-

Amount recognized at statement of financial position	-	-	-	·*·		-	2,918

E. Credit risk

The Company has no significant concentration of credit risk. The Company has policies that limit the amount of credit exposure to any single counter party. The Company's maximum exposure to credit risk is represented by the carrying amount of each financial asset in the Statement of financial position.

	31 December 2020	31 December 2019
Cash and cash equivalents	1,156	345
Term deposits	10,705	9,263
Investments in securities	250	-
Insurance receivables	851	938

Reinsurance assets	1,387	-
Other Assets	530	500
MAXIMUM EXPOSURES TO CREDIT RISK	16,287	12,395

Terms Deposits and Cash and cash equivalents. All term deposits and cash held in current account are with Republic of Kosovo licensed banks. However, exposure to a single bank should not exceed 30% of term deposits according to Company policy and CBK regulations.

Government Bonds. During the year the Company has invested in Government Bonds issued from Republic of Kosovo and are not rated.

Reinsurance Share of insurance liabilities. The Company has credit risk exposure related to reinsurance assets. The exposure related to reinsurance is with VIG Re which has credit rating A+ from Standard and Poor's.

Receivables from related parties

The company has a credit risk exposure with a related party, which as at 31 December 2020 owed the company EUR 1,408 thousand. This balance was within its terms of trade and no impairment was made as at 31 December 2020 and 2019. There are no guarantees against this receivable, but management closely monitors the receivable balance on a monthly basis.

Other Asset

Credit risk related to other assets is mainly related to advances to the Kosovo Insurance Bureau.

Insurance receivable. The Company actively manages its product mix to ensure that there is no significant concentration of credit risk.

The age structure of insurance receivables as of 31 December 2020 and 2019 is as follows:

409 442	31 December 2019 532 406
31 December 2020	2.12

	141 132 83 187 952 (101) 851

IC SCARDIAN J.S.C NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2020

Movements in the provision for impairment of premium receivables that are assessed for impairment collectively are as follows:

At 31 December	101	59
Write off (Recoveries)	(11)	
Provision for impairment recognized during the year	53	29
At 1 January	59	30
	2020	2019

F. Market Risk

The Company takes on exposure to market risks. Market risks arise from open positions in (a) foreign currencies and (b) interest bearing assets and liabilities. Management sets limits on the value of risk that may be accepted, which is monitored on a daily basis. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

Interest Rate Risk

The Company's exposure to interest risk relates to deposits placed in local commercial banks. Deposits are with the reputable banks. Outstanding claims and provision for unearned premiums are not directly sensitive to market interest rates because are not discounted and non-interest bearing.

Foreign currency risk

The Company is not exposed to foreign currency risk since all of its transactions are performed in local currency.

G. Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents, then, availability of funds through adequate credit facilities and ability to collect timely, within the terms established the amounts due from the deposits.

H. Capital risk management

The Company's objectives when managing capital are to:

- safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital.

The Company is subject to minimum capital requirements. The capital requirements are monitored from Central Bank of Republic of Kosovo (CBK). As at 31 December 2020 the Company was in Compliance with capital requirements.

	31 December 2020 EUR'000	31 December 2019 EUR'000
Available Capital according to CBK Regulation	4,960	2,621
Minimum required capital	3,200	3,200
Surplus/(Deficit)	1,760	(579)

5. FAIR VALUE ESTIMATION

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values have been based on management assumptions according to the profile of the asset and liability base.

A. Financial and insurance instruments measured at fair value

The financial assets measured according to the fair value in the statement of financial position are presented in accordance with the hierarchy of the fair value. This hierarchy Company's financial assets and liabilities into three levels that are based on the significance of the incoming data used during the measurement of the fair value of the financial assets:

- Level 1: quoted prices (not adjusted) on the active markets for identical assets or liabilities;
- Level 2: other incoming data, aside from the quoted prices, included in Level 1 which are available for asset or liability observing, directly (i.e. as prices), or indirectly (i.e. made of prices) and
- Level 3: incoming data on the asset or liability that are not based on data available for market observing.

As of the reporting dates, the Company does not have financial instruments measured at fair value.

Financial assets not measured at fair value

The difference between carrying value and fair value of those financial assets and liabilities which are not presented in the Statement of financial position at their fair value are as follows:

31 De	cember 2020	31 D	ecember 2019
Carrying amount	Fair value	Carrying amount	Fair value
1,156	1,156	345	345
10,705	10,705	9,263	9,263
250	250	-	-
851	851	938	938
1,408	1,408	1,349	1,349
1,387	1,387	-	-
530	530	500	500
16,287	16,287	12,395	12,395
4,849	4,849	4,474	4,474
312	312	438	438
1,150	1,150	216	216
6,311	6,311	5,128	5,128
	Carrying amount 1,156 10,705 250 851 1,408 1,387 530 16,287 4,849 312 1,150	amount 1,156 10,705 10,705 250 250 851 851 1,408 1,408 1,387 530 530 16,287 16,287 4,849 312 312 1,150 1,150	Carrying amount Fair value amount Carrying amount 1,156 1,156 345 10,705 10,705 9,263 250 250 - 851 851 938 1,408 1,349 - 1,387 1,387 - 530 530 500 16,287 16,287 12,395 4,849 4,849 4,474 312 312 438 1,150 1,150 216

The management assessed that cash and term deposits, insurance receivables, other payable and claim provisions approximate their carrying amounts largely due to the short-term maturities of these instruments.

B. Fair value measurement of non-financial assets

This note explains the judgements and estimates made in determining the fair values of the non-financial assets that are recognized and measured at fair value in the financial statements. The Company classified land in the level

31 December 2020	Level 1	Level 2	Level 3	Total
Land		1,838	-	1,838
TOTAL NON-FINANCIAL ASSETS	-	1,838	*	1,838
31 December 2019	Level 1	Level 2	Level 3	Total
Land	-	1,838	-	1,838
TOTAL NON-FINANCIAL ASSETS		1,838	-	1,838

IC SCARDIAN J.S.C NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2020

Valuation techniques used to determine level 2 and level 3 fair values

The company obtains independent valuations for its investment properties at least annually and for its freehold land.

At the end of each reporting period, the directors update their assessment of the fair value of each property, taking into account the most recent independent valuations. The directors determine a property's value within a range of reasonable fair value estimates.

The best evidence of fair value is current prices in an active market for similar properties. Where such information is not available the directors consider information from a variety of sources including:

- current prices in an active market for properties of different nature or recent prices of similar properties in less active markets, adjusted to reflect those differences
- · discounted cash flow projections based on reliable estimates of future cash flows
- capitalized income projections based upon a property's estimated net market income, and a capitalization rate derived from an analysis of market evidence.

The level 2 fair value of land has been derived using the sales comparison approach. The key inputs under this approach are the price per square meter from current year sales of comparable lots of land in the area (location and size).

The calculation of fair value of land is done using price per square meter of the land in the same area:

			31 December 2020 EUR'000	31 December 2019 EUR'000
Total square meters	Price per Square meter	Location		
11,486	EUR 160	Hajvali, Pristina	1,838	1,838
			1,838	1,838

26 SHARE OF EXPENSES TO KOSOVO INSURANCE BUREAU

The Kosovo Insurance Bureau ("KIB") administers the system to sell compulsory third party liability motor vehicle insurance ("CTPL") at the border of the Territory of Kosovo (the "pool") to drivers of foreign registered vehicles not in possession of such insurance, on behalf of all insurance companies licensed in republic of Kosovo. KIB remits to each insurance company monthly its share of the gross premiums received and their share of claim and administrative expenses. In addition, each insurance company is required to contribute to KIB for the Compensation Fund Kosovo ("CFK"). The role of CFK is to pay insurance claims related to accidents caused by uninsured vehicles, unknown vehicles or other specified events.

28 PREMIUM AND INCOME TAX		

Premium tax. The premium tax was paid in accordance with Law no. 05/L-029 "On Corporate Income Tax" which was effective from 1 September 2015 up to 5 August 2019. In accordance with the law the insurance companies were required to pay a premium tax of 5% on their quarterly gross premiums. Premiums returned and retrospective premium adjustments are deducted from gross premiums to arrive at the tax base. Based on this law the Insurance companies were not liable to tax on profit in Kosovo for the years up to 31 December 2018 and the period from 1 January 2019 up to 5 August 2019.

Income tax. Insurance Companies are liable to tax on profit with the new Law no. 06/L-105 "On Corporate Income Tax" which is effective from 5 August 2019. In accordance with the Law insurance companies are required to pay the corporate income tax at 10 % at their taxable profits. The tax rate on taxable corporate income is fixed at 10%. According to Tax Authority interpretation specifically for insurance industry, starting from 5 August 2019 insurance companies for tax purposes should calculate separately Gross Written Premiums, unearned premium reserves, Paid Claims only for the insurance contracts issued after 5 August 2019. The reconciliation of accounting profit with income tax expenses is presented below:

29 COMMITMENTS AND CONTINGENCY

Litigation

From time to time and in the normal course of business, claims against the Company may be received. On the basis of its own estimates and both internal and external professional advice, management is of the opinion that no material losses will be incurred in respect of claims in excess of provisions that have been made in these financial statements.

As at 31 December 2020 there are 151 legal cases, with reserve in the amount of EUR 436 thousand (31 December 2019: 109 legal cases with reserve EUR 437 thousand).

The Company's Management regularly analyses potential risks resulting from losses regarding legal proceedings, along with proceedings and possible receivables aimed against the Company, which may arise in the future. Although the outcome of these matters cannot always be ascertained with precision, the management of the Company believes that no material liabilities above the provisions reserved is likely to occur.

Tax liabilities

The Company's financial statements for the years ended 31 December 2014 to 2020 are subject to inspection by local tax authorities. The Company has followed all tax rules and regulations in calculating tax liabilities, however tax interpretations as per tax authorities may differ from those used by the Company.

30 RELATED PARTY TRANSACTIONS

A party is related to an entity if, directly or indirectly through one or more intermediaries, the party controls, is controlled by, or is under common control with the entity, the party has an interest in the entity that gives it significant influence over the entity, the party has joint control over the entity, the party is an associate or the party is a member of the key management personnel of the entity or its parent.

The Company has related party transactions during the normal course of business activities. The table below presents the volume and balances from the related party transactions as of and for the years ended 31 December 2020 and 2019.

31 EVENTS AFTER THE REPORTING DATE

The impact of the Coronavirus (COVID-19) pandemic is ongoing and while it has been financially positive for the Company up to 31 December 2020, it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on measures imposed or to be imposed by the Government of Republic of Kosovo. Management will continue to monitor the potential impact and take all possible steps to mitigate any effects.

There are no other significant events after the statement of financial position date that may require adjustment or disclosure in the financial statements.
